† Black and color print speeds are measured in accordance with ISO/IEC 24734. Actual print times will vary based on factors including system configuration, software and page complexity. For more information, visit www.epson.com/printspeed

†† Black and color copy speeds are determined in accordance with ISO/IEC 29183. Actual copy times will vary based on factors including system configuration, and page complexity. For more information, visit www.epson.com/copyspeed

1 Based on 200 dpi, letter-size, in Black-and-White or color. 2 Compared to similarly featured A4 color laser printers and copiers with speeds of 31 - 40 ppm per industry available data as of November 2023. Actual power savings will vary by product model and usage. 3 Most features require an Internet connection to the printer, as well as an Internet- and/or email-enabled device. For a list of Epson Connect enabled printers and compatible devices and apps, visit www.epson.com/connect

4 Requires Epson Smart Panel app download. Data usage fees may apply. 5 Requires an Internet connection, a free Epson Connect account and a destination email address or cloud storage account. For a list of supported cloud services, visit www.epson.com/connect

6 Wi-Fi CERTIFIED™; level of performance subject to the range of the router being used. Wi-Fi Direct® may require printer software. 7 Only printing and scanning are supported under Windows Server OS. 8 Some applications and/or functions may not be supported under Mac OS X and macOS. 9 RAM size definition is the total amount of RAM memory capacity inside the device, regardless of memory use. 10 Internet access is required to install Mac OS X and macOS drivers and software. 11 Not all media types are supported for PCL printing. 12 Replacement cartridge yields are based on ISO/IEC 24711 tests in Default Mode printing continuously. Cartridge yields vary considerably for reasons including images printed, print settings, temperature and humidity. Yields may be lower when printing infrequently or predominantly with one ink color. All ink colors are used for printing and printer maintenance, and all colors have to be installed for printing. For print quality, part of the ink from the included cartridges is used for printer startup and a variable amount of ink remains in the cartridges after the "replace cartridge" signal. For details, visit www.epson.com/inkinfo

13 Display permanence based on accelerated testing of prints displayed under glass in indoor display conditions; album permanence based on accelerated testing of prints in dark storage conditions. Actual print stability will vary according to media, printed image, display conditions, light intensity, temperature, humidity and atmospheric conditions. Epson does not guarantee the longevity of prints. For maximum print life, display all prints under glass or UV filter or properly store them. 14 For convenient and reasonable recycling options, visit www.epson.com/recycle
